

A simple, natural, cost-free way to good health

With the growing awareness of holistic medicine, the possibility for healing the spiritual way is getting more attention, in professional circles as well. One name in connection with it keeps coming up: Bruno Gröning (1906 - 1959). During the fifties, his innumerable healing successes made him the public focus around the world. He left us the knowledge of how to take up the healing force, the "Heilstrom". Many success reports from all over the world proves the actual effectiveness of his teaching.

Bruno Gröning's Teaching

Bruno Gröning

For thousands of years, the existence of a higher force that can help and heal has been spoken about in all high cultures of humanity. Bruno Gröning compares people to a battery that uses up energy in daily use and that has to be continually recharged. Bruno Gröning explained how every one can fill up with new life

energy this way: "Believing in the good energy is just as important a precondition here as is the will for good health. We are all surrounded by healing waves all the time that we just need to take in. According to the teaching of Bruno Gröning, God is the greatest physician. He doesn't know any incurable illness, only people who are not yet able to open up to the work of the spirit. He kept advising: "Don't be gullible. Convince yourself first!"

Reaction of Psychologists & Physicians of the Medical Scientific Group (MWF)

These short reports are examples of the special effectiveness of Bruno Gröning's teaching. In contrast to conventional therapeutic methods, mere improvement of symptoms is not the goal here, but deliverance from the inner causes of the addiction. Experience shows that these healings are absolutely permanent and stand up to stress situations. Remarkably positive is also the reintegration into family & profession.

The Bruno Gröning Circle of Friends

The Bruno Gröning Circle of Friends is one of the largest associations for spiritual healing world wide. Amazing healings keep occurring here, even from organic and emotional illness of many years duration. We are dealing with a spiritual force, the positive effects of which stand up to medical and psychological methods of investigation.

All costs are covered by voluntary donations. An essential part of the teaching of Bruno Gröning is the respect of the free will. There are no financial or legal obligations involved. No medical consultations, examinations, or treatments take place.

The Medical Scientific Group (MWF)

The MWF is an international association of several thousand physicians, psychologists and representatives of other health care professions from over 60 countries. Since 1992, they examine healings and help received the spiritual way through the teaching of Bruno Gröning. The MWF shares its experiences through publications, regular lectures in and outside of Germany, as well as in conferences, at no cost for those needing help or simply interested.
